Ready for summer

Clear blue skies, sun overhead and countless places to visit. Summer calls for new experiences. Whatever the destination, the journey itself can be part of some unforgettable moments.

Simply equip the car with a multimedia holder for attaching a tablet and put a smile on children's faces while watching cartoons or playing games. Listening to the favourite music in the shade of the sun shades while sipping a perfectly chilled drink from the car's cooling box creates the right atmosphere for a truly extraordinary day. Likewise, the convenient installation of the bicycles in the rack will further enhance a carefree sports expedition.

Not only these products from the Škoda Genuine Accessories collection will turn travelling on hot summer days into a pleasant experience.

Thermo-electric cooling/warming box – 15l
5L0065400

The 15-litre cooling box quickly and evenly cools food and drinks up to 20 °C below the outside temperature. The 65 °C warming function, on the other hand, allows to reheat or keep food warm for a long time. It is equipped with a fold-down shelf for small food and wire holders for storing two 1.5 to 2 litre bottles. The cooling box can be powered from the car's 12 V socket.

Cooling boxes

Thermo-electric cooling box – 20l
000065400G

Having a properly chilled beverage on board at all times guarantees comfortable travel on hot summer days. Its performance cools the inserted food up to 18 °C cooler than the ambient temperature and it can even hold 2 litre bottles. In addition, thanks to the sturdy handle as well as adjustable

shoulder strap, this generous 20-litre cooling box, guarantees comfortable and easy handling when carrying outside the car, for example when having a picnic in the countryside. External pockets offer practical storage space for cutlery and napkins, for example. In the car, the cooling

box is powered from a 12 V socket. However, it can also be connected to the 230 V AC mains. In this case, it is possible to set the ECO function, where it uses less energy, or switch to the MAX function, where it reaches its maximum cooling effect.

Coffee maker

Portable coffee maker 000069641D

Irresistible aroma, rich creamy foam and exquisite taste. A cup of real espresso in just 2 minutes, with the portable coffee maker. Anytime, anywhere. Just park, shift into neutral or select parking mode and pull the handbrake. Pour water into the coffee maker, insert the coffee capsule and plug it into the car's 12 V socket with the integrated cable.

When the car's engine is on it will provide the necessary power. The result is delicious coffee that stimulates the body and mind. All types of capsules compatible with Nespresso machines can be used to prepare it. In addition to the coffee maker and cup, the kit also includes a microfiber cloth and cleaning brush.

Sun shades

Sun shades

They provide pleasant shade and prevent the interior from heating up. The special structure of the sun shades effectively protects against the sun's harsh rays without significantly restricting the view from the car. They perfectly follow the shape of the windows, thus covering their entire

surface. They provide a shade for children to sleep and prevent child seats from heating up when parked in the sun. In addition, they prevent insects from entering the car when the windows are rolled down.

Order numbers for the sun shades are listed on page 7.

Entertainment Pack

Entertainment Pack

Although children may find even a short trip too long and boring, the Entertainment Pack may turn any journey into time filled with fun and laughter. Simply attach each of the two Smart Holder adapters between the headrest bars on the front seats (other than sports seats) and then snap the Smart Holder multimedia holder into the adapter.

Each child can then place their mobile phone or tablet into their holder and make the trip more enjoyable by watching cartoons or playing games, independently of the other sibling. As a result, the children do not distract the driver's attention, and the driver can fully focus on driving.

The Entertainment Pack order number is listed on page 11.

Comfort Pack

Comfort Pack

The Comfort Pack is based on two Smart Holder adapters that make it possible to fit various combinations of other Smart Holders, depending on the situation. During working weeks, the hook can be used to hang a handbag or briefcase, while the hanger may be found useful for hanging a jacket to prevent it from getting wrinkled. On weekend family trips,

the hook can be used to hang a backpack, and to please the youngest member of the crew, the hanger can be replaced with the multimedia holder for the sake of fitting a tablet or mobile phone. The set also includes the door panel bin that will come in handy on any trip.

Order numbers for the Comfort Pack are listed on page 11.

Smart Holders

Smart Holder – adapter

The adapter is the starting point for fitting other Smart Holders. It is attached between the headrest bars on the front seats (other than sports seats). Thanks to an integrated joint, it is very easy to install. The adapter can then be fitted with the multimedia holder, the hanger or the hook, depending on the needs of the moment.

Smart Holder – hanger

To prevent unwanted deformation of clothes, we carefully hang them on hangers in our wardrobes. It can be no different in a car. Hang a shirt, blouse, jacket or blazer on the hanger to prevent it from wrinkling. The specific shape of the hanger prevents even the finest shirt from slipping off, even when sport driving. High-quality stainless steel gives the hanger a premium look.

Smart Holder – multimedia holder

Placing a mobile phone or tablet into the multimedia holder can create optimum conditions for passengers for watching movies, playing games or surfing the internet. To set the ideal display position, the holder can be rotated continuously through 360° and tilted forwards, backwards and sideways by up to 30°. In some models the holder can also be installed into a folded rear-seat armrest.

Smart Holder – hook

No more spilling of the handbag and shopping bag contents! The hook is another typical example of an accessory that makes everyday life more pleasant. Its sturdy design makes it possible to hang a handbag, bag or backpack of a maximum weight of 3 kg to prevent such items from tipping over and their contents from spilling. Moreover, there is no longer any risk of soiling the handbag, in contrast with when it is placed on the floor where it can easily pick up dirt brought in on shoes.

The Smart Holders order numbers are listed on page 11.

Interior mats

Textile foot mats

The days when plastic foot mats (made of thermoplastic elastomer) effectively prevented melting snow on vehicle occupants' shoes from seeping into the floor are long gone. Now it's time to replace them with a sleeker version made of thick and durable black textile material. The mats are not only visually attractive, but also highly functional. Their unique shape allows them to perfectly fill the space under

occupants' feet, thus trapping all possible dirt. Besides that, the front mats are decorated with the name of the model concerned. Two options are available: Standard and Prestige, an exquisite line with increased weight-per-square-metre textile edged with brushed leather or decorative stitching. Each set includes two front mats and two rear mats.

Footrest "Lounge Step"

A set of two footrests can be used to make passengers' travel experience even more comfortable. The footrests are placed directly onto the textile foot mats, creating comfortable support for the feet. As they also feature black textile on the surface, the footrests are a perfect match with the foot mats.

Order numbers for the textile foot mats and the footrest "Lounge Step" are listed on page 13.

Boot mats

Double-sided boot mat

Double-sided boot mats are designed for transporting dry and clean items in the boot. The top side is covered with a high-quality textile fabric. Even in summertime, situations may arise where it becomes necessary to transport wet or, for example, mud-stained items. In such case, simply flip the boot mat over, as the plastic reverse side effectively prevents dirt from soiling and seeping into the floor.

Order numbers for the double-sided boot mats are listed on page 15.

Double-sided boot mat – foldable

Combining practical advantages of two different boot mats, this product can also be spread over folded rear seats and over the loading edge of the car. This foldable double-sided boot mat is designed for transport of oversized items. When unfolded, its plastic surface prevents the seats from getting soiled and dirt from seeping into the floor, while the cover on the opposite side protects the bumper from scratches

and prevents the clothes of people loading items into the boot from getting dirty. When folded, the top is fabric, and any dirt trapped on the product's plastic side is thus hidden from sight.

Mud flaps

Mud flaps

Designed to prevent water from splashing around while the vehicle runs through a puddle or when it is raining, trap swirling dust in off-road conditions and protect the body paint from gravel flying off the wheels. The mud flaps protect the underside, sides and rear of the

vehicle from dirt in all kinds of weather. Their subtle design is in harmony with the body lines of each model. Perfectly copying the shape of the wheel well, the flaps do not affect the vehicle's aerodynamic properties.

Order numbers for the mud flaps are listed on page 18.

Umbrella

Umbrella

Coming in handy whenever the weather changes suddenly, this umbrella is available in the driver-side front-door storage compartment or under the front passenger seat. To prevent other passengers from getting soaked in rainy weather, it is advisable to place additional umbrellas permanently in

the netting system provided in the luggage compartment. Prepared to withstands even strong wind gusts thanks to its robust yet lightweight metal design, this elegant automatic folding umbrella in black colour comes with a textile sleeve.

The umbrella order numbers are listed on page 18.

Assembly video

Roof racks

Roof racks

Roof racks are an essential element for the installation of a roof box or bicycle rack. Thanks to the carrier profile with the so-called T-track, they guarantee secure fixation of the load on the roof of the vehicle. They are easy to install and dismantle. Their aerodynamic shape eliminates air resistance and thus prevents unpleasant sound. They

are characterised by exceptional strength, load-bearing capacity, corrosion resistance and long service life, just like other Škoda transport systems. They are protected against theft by a lock.

Roof rack sack

A double-chamber sack made of waterproof fabric protects the roof racks from damage during handling and storage. The racks are separated in the sack, which prevents them from rubbing against each other. Roof rack keys can be stored in the closable zipper pocket. For easy carrying, the sack is equipped with two sturdy handles.

Order numbers for the roof racks and the roof rack sack are listed on page 20.

Assembly video

Roof boxes

Roof boxes

When travelling for summer sports, a trip or a holiday by the sea, the roof box is the ideal solution for transporting luggage and sports equipment for which there is no longer room in the boot. The exclusive design of the roof boxes perfectly matches the lines of current Škoda models. Their aerodynamic shape minimizes air resistance and associated driving noise. It also contributes to the car's driving stability

and reduces vibrations even at high speeds. While also significantly eliminating the increase in fuel consumption. The maximum load capacity is 75 kg. Inserted items can be secured with fastening straps. The roof boxes have a central security lock that controls several locking points, against theft. The surface treatment including UV protection prevents ageing and visual degradation. Another advantage

is their easy assembly and handling. This is further enhanced in the case of the 400-litre box by the possibility of opening the lid on both sides. The rear of the boxes is deliberately slanted to not obstruct the full opening of the 5th car door. The range consists of boxes with an internal volume of 380 litres and 400 litres, in black or silver.

Order numbers for the roof boxes are listed on page 20.

Bicycle rack – aluminium
000071128P

Roof bicycle racks

Bicycle rack – stainless steel
000071128D

Roof bicycle racks

Sunny days encourage cycling. Roof bicycle racks are designed to transport bicycles safely and reliably to the start of the cycle route. Mounting the bicycle in the rack, attaching it and then removing it is intuitive and quick. The bicycle frame is attached to the rack by means of a folding lever. Fixing straps are used to fix the rims to grooves, the length of the fixing straps can be adjusted according to the

width of the specific wheel tyre. These effectively prevent unwanted wobbling or oscillation. The rack must be locked. This protects both the bicycle and the rack from theft. As a result, the empty rack is safe for the duration of the cycling tour and does not need to be stored in the boot of the car. There are two types of racks. The aluminium bicycle rack allows the transport of a maximum 20 kg bicycle with

a round tube frame with a diameter of 22–80 mm, or with an oval tube frame with maximum dimensions of 80 × 100 mm. The stainless steel bicycle rack is designed to carry a maximum 17 kg bicycle with a round tube frame with a diameter of 22–70 mm or with an oval tube frame with maximum dimensions of 65 × 80 mm.

Towbar rack for 3 bicycles
000071105P

Assembly video

Towbar bicycle racks

Towbar rack for 2 bicycles
000071105F

Towbar bicycle racks

The biggest advantage of this bicycle rack is the way the bicycles can be installed. Due to the position of the rack, the bicycles only need to be raised a few centimetres above the ground. This allows even a delicate woman to do so gracefully and effortlessly. Compared to roof bicycle racks, it has less impact on the aerodynamics of the car and can also be driven into low-profile areas such as underground garages and underpasses. The bicycles are attached to the

rack using bicycle frame brackets and tie-down straps. Even when fully loaded, the folding function of the rack allows convenient access to the luggage compartment of the vehicle. With one key, lock both the rack to the towbar as well as the individual bicycles to the rack. The rack has a license plate holder, complete rear lights and a 13-pin electrical connection. The towbar rack for 2 bicycles is designed for bicycles with a maximum total weight of 36 kg

with a round tube frame diameter of 22–70 mm. The towbar rack for 3 bicycles is designed for bicycles with a round tube frame with a diameter of 22–80 mm. The load capacity is specified in more detail in the assembly instructions. The bicycle rack arm can be folded down for easier carrying and space-saving storage.

Car care

Car care

A specially developed collection of car care enables professional car caring. It consists of original products for interior, exterior and wheel cleaning and care. The unique composition of active ingredients guarantees thorough and

quick removal of dirt without effort, and without damaging the car body paint or other parts of the vehicle. All products have been subjected to laboratory testing, which has clearly demonstrated their premium quality and high efficiency.

Car care – interior

All in one – universal cleaner 000096301C

The versatile cleaning spray consistently removes dirt, nicotine residue and stains from windows, seats, rubber and plastic parts. Thanks to its unique formula, it is gentle on particularly sensitive textiles such as Alcantara. It leaves a pleasant scent after application.

Dashboard care 000096307D

Surface active agent which protects and restores interior plastic surfaces. The high-grade emulsion gives plastics a rich satin appearance and forms a protective film on them to prevent dust build-up.

2-in-1 display cleaner 000096311T

For perfect removal of dust, dirt and fingerprints from the car's infotainment display. Simply spray the cleaning fluid on the touchscreen and then wipe it with the microfibre cloth that is integrated onto the cleaner.

Refill pack – 2-in-1 display cleaner 000096311AA

If the display cleaner is already empty, there is no need to throw it away and buy a new one. For refilling the cleaning fluid, there is a spare cartridge that allows up to 20 refills of a given cleaner.

Car care – exterior

Washing & waxing shampoo

000096315C

Multifunctional cleaner for manual washing of the car body. In addition to cleaning, degreasing and polishing, it also leaves a protective wax layer on the car surface. The result is a perfectly clean and shiny car.

Insect remover

000096300C

Highly effective insect, pollen and bird droppings remover from windows, rear view mirrors and headlights as well as from car body, plastic and chrome parts. It works very quickly without the risk of damaging paintwork. The product has very good adhesion even on inclined surfaces.

Wheel rim cleaning gel

000096304C

Quickly and thoroughly removes fly rust and brake dust even from hard-to-reach wheel creases. The gel can be used on both light alloy and steel wheels, which are protected by the gel against corrosion thanks to a special additive. The gel consistency prevents the product from quickly trickling down the wheels.

Car care kit – summer

000096356B

A practical set of products for comprehensive car care in summer. The basis is a screen wash additive for a clear, streak-free and glare-free view from the car. To combat insect residues, the kit includes an insect remover with sponge. The products are complemented by a wheel rim cleaning gel.

Paint repair

Spray paints and touch-up pencils

There are many causes of scratches on a car, but there is only one effective solution to remove them. With the help of a spray paint or touch-up pencil, it is possible to restore the car's flawless appearance quickly and easily. This is not just an aesthetic issue, but also a purely practical measure to prevent rust and oxidation. The touch-up pencil is ideal

for removing hairline scratches. For retouching larger scratches, it is advisable to use spray paint. For a perfect result, in addition to the cover coat, the set also includes a transparent coat, which restores the repaired area to its original shine. The correct application procedure is indicated on the product packaging. The collection of spray paints

and touch-up pencils reflects the needs of owners of new and older Škoda models and therefore includes correction products for more than 50 shades of colours. The car's VIN code can be used to identify the specific paint colour.
